

St Bartholomew's

MEDICAL CENTRE

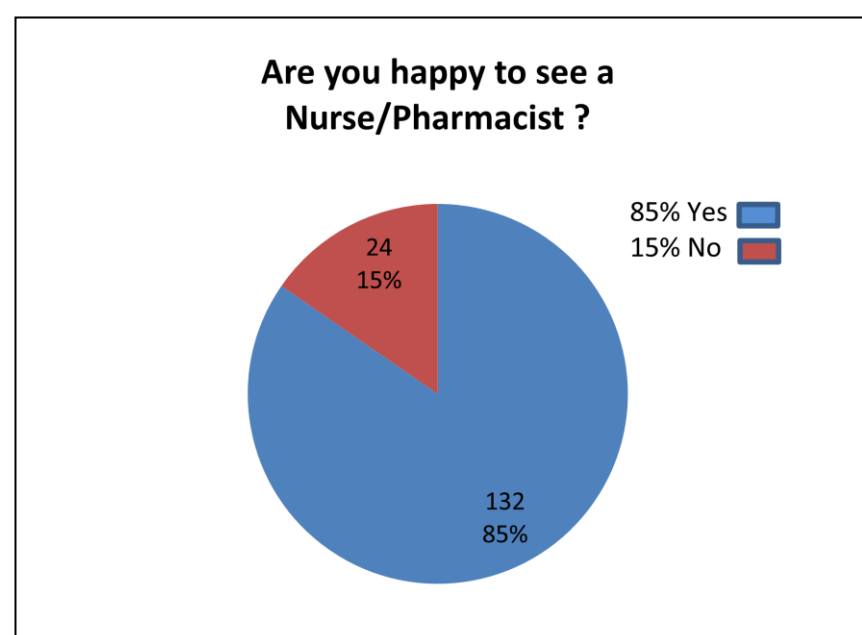

## Patient Participation Group

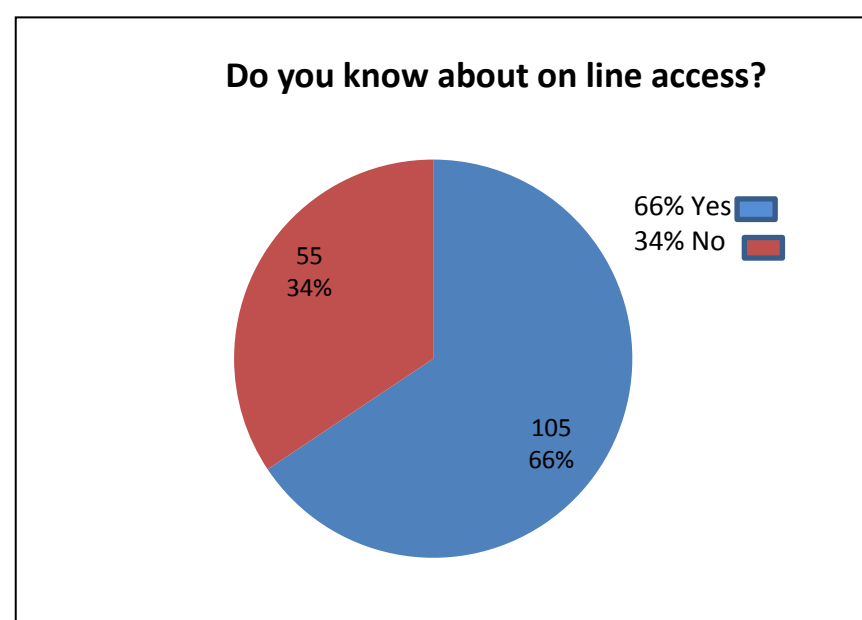

***St Bartholomew's Patient Participation Group recently conducted a patient survey, thank you to all those that took part. The results are below:***

1. There are alternatives to seeing a doctor or a nurse when you visit the practice. We would like to know whether you would be prepared to see a nurse or a pharmacist if, for example, there is a long wait to see a doctor or maybe your problem is relatively minor.

Are you happy to see a nurse or a pharmacist instead of a GP?

2. We are trying to make things easier and quicker for patients to get what they want from the practice. Do you know that there is an on line access system so that you can use the internet to book an appointment, ask for a repeat prescription or see a summary of your medical records?

Have you used this?
