## Research at St Bartholomew's Medical Centre

St Bartholomew's is becoming more research active and you may be invited to take part in our studies either verbally or through the post. All of these projects have gone through strict ethical approvals and have been discussed at research committees.

You are only invited to take part in our research projects because we believe that you may be eligible.

Please note that taking part in research is completely voluntary and that you are under no obligation to participate in any research project that you are invited to take part in.

Agreeing to receive research-related information also does not sign you up to take part in a study, however if you do not wish to be sent any research related information at all, please indicate this as below.

If you would like any more information or have any questions, please ask to speak to Sophie Maslen, Health & Research Practitioner on 01865 244428 (at South Oxford Health Centre, branch surgery of St Bartholomew's Medical Centre)

---
